DATA INNOVATION IN SUPPORT OF THE DEVELOPMENT AGENDA

THURSDAY, MAY 16 | 12.00 P.M. - 2:00 P.M

In Person: OECD Headquarters & Conference Centre (CC7)
2 Rue André Pascal, 75016 Paris (Details)
Virtual: Zoom Link

Dear Development and Data Partners,

We are very proud and happy to welcome you in Paris, at OECD Conference Centre, and online, for next week's Partnership event.

We would like to invite you (participants who have confirmed their presence) to the lunch offered by OECD on May 16th (onsite participants only) and the side event that will follow in the early afternoon, just before the Strategic Advisory Group Meeting.

The detailed agenda for this part of the event is indicated below. You are welcome to **register using this form before May 13th.**

Looking forward to meet you face-to-face all very soon!

The OECD team

DATA INNOVATION IN SUPPORT OF THE DEVELOPMENT AGENDA
AGENDA

12:00 p.m. – 1:00 p.m. **Buffet-lunch offered by the OECD (OECD Conference Centre, G. Marshall room)**

1:00 p.m. – 2:00 p.m.: **Data innovation in support of the development agenda - Side event organized by OECD**

In this side event, organized in a hybrid mode, OECD will present a number of data initiatives which could benefit development partners and data partners and contribute to more innovation opportunities in the context of the development data partnership. For each initiative, a 10' presentation to be followed by 10' Q&A with the room.

The event is chaired by **Asa Johansson, Deputy Director of the Statistics and Data Directorate, OECD.**

- The **OECD Innovation Lab (Annabelle Mourougane, Sebastian Barnes)** The OECD Innovation Lab encourages the application of alternative data and new tools to policy problems, by building a community of researchers across the OECD. The presentation will provide background information on the LAB together with one example of LAB project, which exploits the Automatic Identification System, which tracks vessels across the globe in real time, to monitor maritime trade.
- The **Statistical Information System Collaboration Community (Jonathan Challener)**. How to build a modern and AI-ready data infrastructure, making your data more accessible and usable? How can we do it in an inclusive manner – open source, community model that can benefit all? The SIS-CC unites 16 statistical organizations committed to address these questions together, as "a reference open source community for official statistics, focusing on product excellence and delivering concrete solutions to common problems through co-investment and co-innovation."
- **PARIS21:** the Partnership in Statistics for Development in the XXI century (François Fonteneau). How to develop capacity to produce and use quality data for development outcomes in and with countries of the Global South? Hosted at the OECD, PARIS21 promotes innovation, skills and capacity development and resource mobilization with 60 global, regional, national and local partners and work in 90 different countries every year.
- The **OECD Geospatial Lab (Claudia Baranzelli).** The OECD Geospatial Lab is an international community of stakeholders from the public, private, and not-for-profit sectors, working together to develop and disseminate policy-relevant analyses based on geospatial information. The presentation will provide background information on the lab, alongside examples of recent projects, especially leveraging data made available through the Development Data Partnership.
